Full-Stack Developer focused on creating scalable solutions using **React, Node.js, Java (Spring Boot)** and **TypeScript**. Experience in the design of modern interfaces and secure backend services (**JWTs**), integrating **REST APIs** and **SQL/NoSQL databases**. I bring value throughout the software lifecycle, applying good architecture practices, automated testing (**Jest, JUnit**) and deployment automation (**CI/CD**) in the cloud (**Oracle Cloud, Azure Container Apps**) with **Docker** and **Nginx**. Solid practical base acquired in the General Directorate of Customs and freelance projects.

PROFESSIONAL EXPERIENCE

[Property Group](#)

Full-Stack Web Developer (Freelance)

National District

December 2025 - Delivered

- **Development of a full-stack system** for real estate management, implementing a scalable administrative dashboard with **React, TypeScript** and modular architecture.
- **Construction of RESTful APIs** with **Node.js, Express** and **MongoDB**, managing a relational schema for the control of properties, users and transactions.
- **Deploy and Infrastructure on Oracle Cloud** using **Docker containers** (GHCR), configuring **Nginx** as a reverse proxy with SSL (HTTPS) for secure communication.
- **CI/CD automation** of the entire pipeline using **GitHub Actions** (build → push a GHCR → deploy automatically).

Directorate General of Customs (DGA)

Frontend Web Developer

National District

March 2025 – June 2025

- Development of the frontend of a POS system for cafeteria with **React 19** and **TypeScript**, with invoicing, employee management and order history modules.
- Integration with **REST APIs** for product, customer and sales management.
- Implementation of JWT-based authentication and authorization in frontend applications.
- Manual cross-browser testing and component documentation according to style guides.
- Integration of backend services developed in **ASP.NET Core** through **API consumption**.

EDUCATION

Instituto Tecnológico de Las Américas

Software Development Technologist

La Caleta, Boca Chica

2021 - 2025

TECHNOLOGIES

- Frontend: **React, Next.js, TypeScript, TailwindCSS**
- Backend: **Node.js, Express.js, Java, Spring Boot, REST APIs, JWT Authentication**
- Databases: **MongoDB, PostgreSQL**
- Herramientas: **Git, Docker, GitHub Actions, Oracle Cloud, Nginx, Azure Container Apps, Postman, Vercel, Jest, JUnit**
- Languages: **Spanish** (native) · **English** (Intermediate — Advanced Technical Reading)
